
Strategy 1: Reduce evening peak

```
def strategy_1(load):  
    # Focus: Reduce peak at 18:00 and 19:00 only  
    deltas = [0] * 24  
    # Only adjust hours 18 and 19  
    deltas[18] = load[18] * 0.02 # Reduce by 2%  
    deltas[19] = load[19] * 0.02 # Reduce by 2%  
    return deltas
```
